

AI Technology Safety Roadmap

How Organizations Play Responsibly with AI

▲ START ►

1 Purpose First

- What problem are we solving?
- Who benefits?
- Who could be unintentionally harmed?

2 Data Awareness

- What data is being analyzed?
- Is the data protected?
- Where does it live?
- Is it retained, reused, or shared?

3 Human-in-the-Loop & Accountability

- Who reviews AI output?
- Who is accountable?
- How is the output utilized?

4 Accuracy & Safety Check

- What happens when AI is wrong?
- How do we validate outputs?
- Where is AI not allowed to be the source of truth?

5 Equity & Bias Check

- Could this affect populations differently?
- How would we detect that?

6 Replace vs Enhance Test

- Is judgment being removed?
- Or supported?
- Are we developing staff skills and improving outcomes?

Leaders, Are You Asking the Right Questions?
